The Intrepid Fallen Heroes Fund serves United States military personnel experiencing the Invisible Wounds of War: Traumatic Brain Injury (TBI) and Post-Traumatic Stress (PTS). When our Servicemen and women return from the battlefield, we help them fight The War Within, by building world-class, advanced treatment centers providing the best TBI and PTS care, enabling them to continue to serve on Active Duty and enjoy a productive life.

The late Zachary Fisher, founder of the Intrepid Family of Foundations supporting America’s military personnel and families, believed that those who serve in our military are “our nation’s greatest national resource,” and they deserve all the help that our nation can provide.

Since its founding in 2000, IFHF has provided over $200 million in facilities, programs and financial support to the United States military community.

Previous projects include:

**2000-2005** Provided close to $20 million in grants to families of military heroes killed in action.

**2007** Built the $55 million Center for the Intrepid (CFI) at Brooke Army Medical Center, San Antonio, TX, a state-of-the-art physical rehabilitation center treating service members suffering amputations and severe burns.

**2010** Built the $60 million National Intrepid Center of Excellence (NICOE), providing research, diagnosis and treatment for TBI and PTS, located at Walter Reed National Military Medical Center, Bethesda, MD.

**2012** Launched a program to build a network of satellites to NICOE, called Intrepid Spirit Centers, on military bases across the nation. $75 million has been raised to date resulting in seven completed centers.

**OUR MISSION**

**HOW CAN I HELP?**

“You don’t have to wear a uniform to serve this country. You can serve by helping the Intrepid Fallen Heroes Fund take care of those men and women in uniform who have borne the battle for our freedom.”

- General Richard Cody, USA (Ret.)
31st Vice Chief of Staff of the United States Army

To aid in this important effort providing critical care to our nation’s men and women in uniform, please send contributions to:

**INTREPID FALLEN HEROES FUND**

**OUR HISTORY**

**FIGHTING THE WAR WITHIN**

**BUILDING GYMNASIUMS FOR THE BRAIN**

HEALING THE INVISIBLE WOUNDS
Eight Intrepid Spirit Centers are now in operation. Two more are scheduled to be built. The finished network will span the nation with locations in:

- Fort Belvoir, VA opened July 2013
- Camp Lejeune, NC opened July 2013
- Fort Campbell, KY opened July 2014
- Fort Bragg, NC opened January 2016
- Fort Hood, TX opened January 2016
- Joint Base Lewis-McChord, WA opened November 2017
- Camp Pendleton, CA opened April 2018
- Eglin Air Force Base, FL opened June 2020

Please help us build the final two centers. Each will cost $14 million to complete:

- Fort Carson, CO
- Fort Bliss, TX

Patients at Intrepid Spirit Centers come from all branches of the armed forces and receive comprehensive, interdisciplinary and individually tailored evaluations and treatment. New techniques, such as music and art therapy programs, help service members fully understand the effects of their injuries while activating specific neuro-healing processes. Each Intrepid Spirit Center incorporates a variety of specialties including:

- Neurology
- Neuropsychology
- Psychiatry
- Family Therapy
- Art & Music Therapy
- Speech Pathology
- Audiology
- Ophthalmology
- Physical Therapy
- Occupational Therapy
- Service member and family

"Many scars are not visible. There are no tourniquets to reduce the conditions of TBI."

- CWO3 Frederick Macias, USA

Treated at the Intrepid Spirit Center at Joint Base Lewis-McChord

In response to this critical need, in 2010, IFHF built the National Intrepid Center of Excellence (NICoE) at Walter Reed National Military Medical Center in Bethesda, MD. As the military’s primary facility for research, diagnosis and treatment of TBI and PTS, NICoE incorporates a groundbreaking interdisciplinary model of care.

To further extend NICoE’s high level of care, in 2012, IFHF began building a series of ten satellites to NICoE, named Intrepid Spirit Centers, located on military bases across the country. This allows service members to be treated closer to home so their families can participate, as their support is crucial to effective TBI care. More than 90% of service members treated at NICoE and the Intrepid Spirit Centers are able to continue on Active Duty and enjoy a full life.

The Intrepid Fallen Heroes Fund (IFHF) assists military personnel afflicted by the Invisible Wounds of War: Traumatic Brain Injury (TBI) and Post-Traumatic Stress (PTS), the signature wounds of today’s wars. Since 2000, close to 400,000 service members have been diagnosed with TBI according to the U.S. Department of Defense. TBI accounts for 36% of all injuries suffered by American military personnel. Amputations account for 10% of injuries.
